

Assignment-1

Page No: _____

Date: _____

① Define a problem Statement and give a brief Executive Summary Snapshot.

→ Intern doctors often struggle with managing their clinical workload efficiently, impacting their performance and learning opportunities.

A) Executive Summary:- Improving Clinical Workload Management for Intern Doctors

Project Description:-

The project aims to enhance the efficiency of clinical workload management for intern doctors, addressing issues impacting their performance and learning opportunities. "It focuses on identifying key challenges, analyzing their effects, and implementing a structured process to improve workload handling and professional development." "This comprehensive approach aims to address the key issues affecting intern doctors and to foster a more balanced, supportive, and educational work environment."

Points Analysis:-

1. High patient volumes:-

- Issue: Interns often handle large patient loads, leading to increased pressure and potential burnout.
- Impact:- Stress and fatigue can compromise care quality and learning effectiveness.

2. Time Management Issues:-

- Issue:- Interns struggle with balancing clinical duties, administrative responsibilities, and educational activities.
- Impact:- Inefficient time allocation reduces their ability to focus on both patient care and skill development.

3. Inadequate Support:-

- Issue:- Limited guidance from supervisors and insufficient resources affect workload management.
- Impact:- Interns may lack the necessary tools and support to handle their responsibilities effectively.

4. Learning Opportunities:-

- Issue:- Heavy workloads limit time available for structured learning and skill enhancement.
- Impact:- Interns miss out on crucial educational experiences that are vital for their professional growth.

Findings:

1. No proper filing of patients: Due to excess workload; Intern leads to carry lots of files of patients; leads to burnout.
2. Increased stress: Interns experience significant stress due to excessive workloads, impacting their well-being and job satisfaction.
3. Reduced Quality of care: Overburdened interns may not provide optimal patient care, affecting overall patient outcomes.
4. Hindered Professional Growth: Interns have limited opportunities for learning and skill enhancement, affecting their long-term career development.

Scope: - The project will focus on:-

1. Analyzing current workload management practices and identifying inefficiencies.
2. Assessing the impact of workload on intern performance and learning.
3. Developing and implementing strategies to improve workload management and support systems.

Delivery: - Implement improvements in workload management through phased strategies over six months.

Cost: - Estimated at \$2000. for process development, support and training.

Deadlines: - Initial changes completed in 6 months, with ongoing adjustments and evaluations for an additional 6 months.

Proposed Process:-

1. Data collection:- Gather data through surveys, interviews, and observations to understand current challenges and their impacts.
2. Analysis:- Evaluate the collected data to identify key problem areas and their effects on performance and learning.
3. Strategy Development: Design strategies to address identified issues, including time management training, improved support mechanisms, and workload redistribution.
4. Implementation: Introduce the proposed strategies, including enhanced scheduling tools, additional mentorship programs, and support resources and services.
5. Evaluation:- Monitor and assess the effectiveness of implemented strategies through feedback and performance metrics to ensure continuous improvement.

This approach aims to alleviate the challenges faced by intern doctors, enhancing both their efficiency and learning experiences, ultimately leading to better patient care and professional growth.

• Prototype of App for Intern Doctors:-

"MedIntern App"

1. Home Screen:-

- Overview: Summary of tasks, patient load, and study reminders.
- Navigation: Quick access to Patients, Work, Files and Study.

2. Patient Management:

- Patient List: Search and filter patients, view profiles.
- Profile Details: Medical History, current treatment, and tasks.

3. Work Management:-

- Task Manager: Daily to-do lists, task prioritization, and progress tracking.
- Calendar: Schedule appointments and tasks.

4. File Management:

- Document Storage: Organize patient files and reports.
- Search & filter: Tools to manage and locate documents.

5. Study and Learning:-

- Resources Library: Access educational materials & modules.
- Study Schedule: Plan and track study sessions and learning progress.

6. Integration support:-

- Mentorship: Connect with mentors for feedback.
- Help Desk: Access support and tutorials for app usage.

7. Safety and well-being:-

- Emergency Contacts:- Quickly access emergency contacts and protocols.
- Stress Management:- Tools and resources for managing stress and mental health.
- Incident Reporting:- Report safety concerns or incidents confidentially.
- Workload Balance:- Features to monitor and balance workload to prevent burnout.

This app not only supports efficient workload and patient management but also prioritizes the safety and well-being of intern doctors.

• Write paragraph of problem:-

Intern doctors face significant challenges in managing their clinical workload, which affects their performance and learning opportunities. High patient volumes, inefficient time management, and inadequate support contribute to increased stress, burnout, and compromised patient care. Additionally, the heavy workload limits their time for educational activities, hindering their professional development. Addressing these issues requires effective strategies for workload management, improved support systems, and enhanced learning opportunities, all while ensuring the safety and well-being of the interns.
